ABOUT ME

Engineer (B.Tech, NIT Delhi) transitioning into Software / ML Engineering after several years preparing for the Civil Services and other government examinations. Currently rebuilding core CS fundamentals and completing DeepLearning.AI's Machine Learning Specialization on Coursera. Strong applied background in computer vision, algorithm design, and problem-solving, with active competitive programming credentials.

EDUCATION

National Institute of Technology, Delhi | 2016

Bachelor of Technology, Electronics and Communications Engineering

CERTIFICATIONS & UPSKILLING

Machine Learning Specialization | DeepLearning.AI, via Coursera · 2 of 3 courses complete

- Supervised Machine Learning: Regression and Classification — Completed
- Advanced Learning Algorithms — Completed
- Unsupervised Learning, Recommenders, Reinforcement Learning — In Progress

PROJECTS

CodeGuru — Codeforces Problem Recommender | github.com/rajveer-nit/codeGuru

- Built a rule-based recommender using the Codeforces API to suggest problems matched to rating and tag history.

Ground Zero — Personal Resume Site | github.com/rajveer-nit/Ground-Zero

- Designed and built a custom single-page site in plain HTML/CSS/JS, deployed via GitHub Pages.

3D Object Reconstruction | Dr. Rajiv Tripathi, NIT Delhi

- Calibrated camera geometry using chessboard-pattern reference images.
- Identified and matched key points across frames, stitching them into a single 3D model.

Finger Vein Recognition | Dr. Rajiv Tripathi, NIT Delhi

- Extracted biometric features from infrared and surface-texture images.
- Benchmarked finger-vein matching accuracy against traditional fingerprint matching.

Automatic Headlight Controller for Enhancing ADAS | Dr. M. Hanmandlu, IIT Delhi

- Developed an ROI-selection and tracking algorithm.
- Automated switching to low beam in response to oncoming traffic.

SKILLS

Languages: Python, C / C++, Java, SQL

Foundations: Data Structures & Algorithms, Operating Systems

Currently Learning: Machine Learning Fundamentals, Neural Networks, Reinforcement Learning

COMPETITIVE PROGRAMMING

HackerRank | @cannibal

- Python Rank – 1
- Gold — C++, Java, Python, Problem Solving

LeetCode | @rajveer

- 700+ problems solved
- Contest rating: 1678
